PROFESSIONAL SUMMARY

Aspiring Full Stack Developer with hands-on internship experience in both web application development using MERN stack and .NET. Proven ability to build secure and scalable systems, work with APIs, and apply data-driven insights in real-world projects. Enthusiastic about solving complex problems through code, and eager to contribute to dynamic development teams and data-driven environments.

EDUCATION

B.E. - Computer Engineering **2021-2025**
C.K Pithawalla College of Engineering and Technology, GTU - 8.18 CGPA

HSC **2020-2021**
Shardayatan School, GSEB - 72%

SSC **2018-2019**
Sheth Dhanjisha Rustamji Umrigar Memorial School, GSEB - 80%

WORK EXPERIENCE

Software Developer Intern **Feb 2025 – May 2025**
Cybersecurity Umbrella

- Developed a React.js module integrating bar and radar charts to dynamically reflect user selections across 7 assessment domains.
- Implemented CRUD operations for a phishing detection product using .NET, enabling efficient data management and backend integration.
- Collaborated with cross-functional teams to integrate frontend components with backend APIs.

Python Data Science Intern **June 2024 – July 2024**
Leaf Drive

- Cleaned and analyzed datasets using pandas and NumPy.
- Built machine learning models using Scikit-Learn for classification and regression problems.
- Improved prediction accuracy by 20% through hyperparameter tuning.

PROJECTS

Green Cart | React.js, Node.js, Express.js, MongoDB **Feb 2025 – May 2025**

- Built a full-stack grocery shopping website with admin and user interfaces. Focused on responsive UI design.
- Admins can add, update, and delete products using a dashboard; data is stored in MongoDB.
- Integrated Cloudinary for image uploads and tested APIs using Postman.
- Enabled customers to browse product listings, view details, and place orders with ease.

Next Event | Next.js, MongoDB, Cloudinary **Jan 2026 - Feb 2026**

- Designed and implemented RESTful API routes for creating and retrieving events using Next.js App Router and MongoDB.
- Developed dynamic event detail pages with server-side data fetching and related event recommendation logic.
- Implemented booking form with input validation and backend data persistence.
- Configured Incremental Static Regeneration (ISR) to improve performance and reduce redundant API calls.

TECHNICAL SKILLS

Languages | Python, JavaScript, PHP, C/C++, Java
Frameworks | React.js, Node.js, Express.js, .NET, React Native, Next.js
Databases and Developer Tools | MySQL, MongoDB, Git/GitHub, Cloudinary
